Backend API, Auth & Security (api/src)
24 ISSUES 5 FIXED 19 PENDING

ID	SEV	ISSUE & FIX	LOCATION	STATUS
K1	CRITICAL	CORS reflects every origin with credentials=true origin callback always returns true while credentials:true → any site can make authenticated cross-origin calls (CSRF/data theft). FRONTEND_URL is unused. Fix: Whitelist against env.FRONTEND_URL (+ allowed origins); reject others.	api/src/app.js:36	FIXED
K2	CRITICAL	Payment verify is unauthenticated & unsigned → free team verification POST /payments/verify/:reference has no protect/authorize and no signature check; anyone can mark any (enumerable) reference SUCCESS and auto-set team VERIFIED. Fix: Protect the route, verify server-side against the gateway/webhook signature; never trust a client reference; use a subscription flag, not status=VERIFIED.	api/src/controllers/payments.controller.js:37	OPEN
K3	HIGH	Refresh tokens stored in plaintext; no auth throttling Refresh tokens saved verbatim; a DB leak yields usable tokens. Only a global 100/15min limiter guards login/refresh. Fix: Store SHA-256 hash of the refresh token; add a strict limiter on /auth/login and /auth/refresh.	api/src/controllers/auth.controller.js:91	OPEN
K4	HIGH	Zod validate middleware applied to only 2 of ~50 endpoints Almost all mutating routes accept unvalidated bodies straight into Prisma → 500s / bad data. Fix: Define Zod schemas per route and apply validate() across all create/update endpoints.	api/src/middleware/validate.js	OPEN
K5	HIGH	Mass-assignment in AKC3 create controllers akcFixture/akcSchool/akcTeam create pass req.body directly to Prisma with no whitelist or date coercion. Fix: Add per-model build*Data whitelisting helpers.	api/src/controllers/akc3/fixtures.controller.js:35	OPEN

ID	SEV	ISSUE & FIX	LOCATION	STATUS
K6	HIGH	Missing endpoints /leagues/:id/standings and /scorers Frontend/mock expect dedicated standings & scorers routes; only the nested league-detail exists. Fix: Add GET /leagues/:id/standings and /scorers.	api/src/routes/leagues.routes.js	PARTIAL
K7	HIGH	TopScorer table never populated GOAL/ASSIST events never upsert TopScorer rows, so top-scorer lists are always empty in real builds. Fix: On GOAL/ASSIST (and result recal) upsert TopScorer goals/assists per player/league.	api/src/controllers/fixtures.controller.js:216	PARTIAL
K8	MEDIUM	LiveMatchState never created/updated go-live / live events never write LiveMatchState; getFixture.liveState is always null. Fix: Create/patch LiveMatchState on go-live and on each live event.	api/src/controllers/fixtures.controller.js	OPEN
K9	MEDIUM	No /admin/stats aggregate endpoint AdminDashboard has no real counts source, so it shows hardcoded numbers. Fix: Add authorized GET /admin/stats returning teams/players/pendingDocs/live/recent counts.	api/src/routes/admin.routes.js	OPEN
K10	MEDIUM	Score double-count between events and result GOAL event increments score; saveResult sets absolute score; deleting an event never decrements → inconsistent totals. Fix: Pick one source of truth (derive from events or from result).	api/src/controllers/fixtures.controller.js:216	OPEN
K11	MEDIUM	AKC3 enterResult never sets winnerTeamId; string score compare winnerTeamId ternary always yields undefined; scores compared as strings from req.body. Fix: Parse ints, set winnerTeamId to actual winner (null on draw), compute isDraw from ints.	api/src/controllers/akc3/fixtures.controller.js:60	OPEN
K12	MEDIUM	Document auto-verify requires passport AND national ID (unreachable) Player verifies only when BIRTH_CERTIFICATE + PASSPORT + NATIONAL_ID all approved; players rarely have both passport and ID. Fix: Require birth certificate + (passport OR national ID); validate docType/status enums.	api/src/controllers/documents.controller.js:98	OPEN
K13	MEDIUM	No pagination on list endpoints leagues/teams/players/fixtures/news/etc. return whole tables with deep includes. Fix: Add page/limit take/skip and return totals.	api/src/controllers/*.controller.js	OPEN
K14	MEDIUM	createFixture allows self-play / out-of-league teams No check that homeTeamId≠awayTeamId or that both teams are registered in the league. Fix: Validate distinctness and league membership before create.	api/src/controllers/fixtures.controller.js:75	OPEN
K15	LOW	errorHandler leaks messages; no Prisma code mapping Raw err.message returned; P2002/P2025 surface as 500 instead of 409/404. Fix: Map common Prisma codes to proper status; sanitize messages.	api/src/middleware/errorHandler.js:9	FIXED
K16	LOW	getMe/logout not wrapped in try/catch; null-user crash getMe sets user.password on a possibly-null user → TypeError escaping the handler. Fix: Wrap in try/catch→next(error) and null-check the user.	api/src/controllers/auth.controller.js:207	FIXED
K17	LOW	Public settings expose all rows; updateSettings no whitelist Unauthenticated GET returns every Setting; any admin key is upserted verbatim. Fix: Add isPublic flag; whitelist allowed keys.	api/src/controllers/settings.controller.js:7	OPEN
K18	LOW	Inconsistent reporter authorization (result vs event) saveResult checks fixture-only assignment; addMatchEvent checks fixture OR league. Fix: Unify to fixture-OR-league in both.	api/src/controllers/fixtures.controller.js:126	OPEN

ID	SEV	ISSUE & FIX	LOCATION	STATUS
K19	LOW	Rate-limit response is a raw string, not JSON 429 returns plain text, inconsistent with the {success,message} envelope. Fix: Use a JSON handler; consider per-route limiters.	api/src/app.js:44	FIXED
K20	LOW	addTeamToLeague ignores maxTeams; raw P2002 on dup No maxTeams cap; duplicate insert throws a generic 500. Fix: Enforce maxTeams; return 409 on duplicate.	api/src/controllers/leagues.controller.js:195	OPEN
K21	LOW	Slug collisions unhandled (news/sport/league) slugify(name) can yield duplicate slugs; lookups return the wrong record. Fix: Append a short unique suffix / check-and-increment on collision.	api/src/controllers/news.controller.js:77	OPEN
K22	LOW	Standings stale on revert; omits winless registered teams recalc runs only when new status=COMPLETED and only seeds teams appearing in completed fixtures. Fix: Recalc on transitions into/out of COMPLETED; seed rows from LeagueTeam.	api/src/services/standings.service.js	OPEN
K23	MEDIUM	No email: verification / password reset / approval notices nodemailer + SMTP configured but never used; no forgot/reset password or verification flows. Fix: Implement transactional email + reset/verify endpoints (or remove unused config).	api/src/routes/auth.routes.js	DEFERRED
K24	HIGH	visitorTracker blocks every request with a DB write; userId always null Runs before auth (userId null), awaits activityLog.create on all traffic → latency + unbounded growth. Fix: Fire-and-forget, filter to real page views, place after auth if userId is needed.	api/src/middleware/visitorTracker.js:4	FIXED

Malvyn

Database, Config, Realtime, Deploy & Dead-code (data/infra)

16 ISSUES 11 FIXED 5 PENDING

ID	SEV	ISSUE & FIX	LOCATION	STATUS
M1	CRITICAL	Per-match Pusher channel/event names mismatch → no live match updates Frontend subscribes match- <code>{id}/scoreUpdate statusUpdate event</code> ; backend emits fixture- <code>{id}/matchUpdate matchEvent</code> . Match page gets zero realtime. Fix: Subscribe fixture- <code>{id}</code> and bind matchUpdate/matchEvent to match the backend.	react-app/src/hooks/useLiveMatch.js:88	FIXED
M2	CRITICAL	news.findUnique on non-unique slug → article detail 500 News.slug is not @unique; findUnique({where:{slug}}) fails Prisma validation for every /news/:slug request. Fix: Use findFirst({where:{slug}}) (or add @unique + migrate).	api/src/controllers/news.controller.js:38	FIXED
M3	HIGH	seed.js is non-idempotent → duplicates then crashes on re-run Unguarded create/createMany for leagues/fixtures/standings/assignments; second run duplicates and throws on unique constraints. Fix: Convert to upsert on natural keys or guard with a marker Setting.	api/prisma/seed.js:51	OPEN
M4	HIGH	seed forces Ad id:1 → Postgres sequence desync Explicit id:1 leaves the SERIAL sequence behind; next auto-id ad insert collides on PK. Fix: Remove explicit id (upsert on title) or setval-realign in seed.js.	api/prisma/seed.js:159	OPEN
M5	HIGH	Dead Mongoose/MongoDB backend tree under api/ root A whole parallel MongoDB backend is unused (server.js loads src/app.js) and describes a different data model — misleading dead weight. Fix: Delete api/{controllers,models,routes,config,middleware} legacy tree.	api/controllers, api/models, api/routes, api/config/database.js	FIXED

ID	SEV	ISSUE & FIX	LOCATION	STATUS
M6	MEDIUM	Dead frontend stack (Main.jsx, AuthContext, flat pages, Header) Orphaned older architecture not referenced by App.jsx; wrong API shape/routes; second auth stack with a different token key. Fix: Delete after confirming no imports.	react-app/src/router/Main.jsx, context/AuthContext.jsx, pages/*.jsx, components/layout/Header.jsx, pages/admin/{AdminLayout,Dashboard}.jsx	FIXED
M7	MEDIUM	env.js silently falls back to raw process.env on invalid config On parse failure it exports process.env (unvalidated strings, missing defaults); short JWT_SECRET accepted in dev. Fix: Fail fast on invalid critical vars; merge zod defaults otherwise.	api/src/config/env.js:30	FIXED
M8	MEDIUM	Missing react-app/.env.example VITE_API_URL/VITE_PUSHER_KEY/VITE_PUSHER_CLUSTER/VITE_DEMO are read but undocumented for a fresh clone. Fix: Add react-app/.env.example.	react-app/	FIXED
M9	LOW	Dead VITE_SOCKET_URL + FRONTEND_URL port mismatch (5174 vs 5173) Socket var unused; API FRONTEND_URL points at the wrong Vite port. Fix: Remove VITE_SOCKET_URL; set FRONTEND_URL=http://localhost:5173.	react-app/.env.v:2, api/.env.v:32	FIXED
M10	HIGH	vercel-build runs prisma generate but not migrate deploy Fresh Vercel Postgres has no tables after deploy. Fix: vercel-build: prisma generate && prisma migrate deploy.	api/package.json:13	FIXED
M11	LOW	No seed:extra script / prisma.seed chain seed-extra.js (most page data) has no script and prisma reset won't auto-seed. Fix: Add seed:extra + "prisma":{"seed":"node prisma/seed.js && node prisma/seed-extra.js"}.	api/package.json:12	FIXED
M12	LOW	Obsolete Capacitor bundledWebRuntime key Removed since Capacitor v4; ignored under ^8. Fix: Remove the key; add build:mobile (vite build && cap sync).	react-app/capacitor.config.json:4	FIXED
M13	MEDIUM	PWA: no service worker + only an SVG icon No SW registered and no 192/512 PNG/maskable icons → not installable/offline. Fix: Add vite-plugin-pwa + 192/512 PNG (incl. maskable).	react-app/public/manifest.webmanifest	DEFERRED
M14	LOW	demo/dist is gitignored → demo not self-contained in git serve.js serves ./dist but dist is ignored; a fresh clone of demo/ has no build. Fix: Negate ignore (!demo/dist/) or document a build step.	.gitignore:20	OPEN
M15	MEDIUM	Secrets live in OneDrive-synced .env Real DB password + JWT secret sit in a cloud-synced folder (outside git). Fix: Rotate secrets; keep only in untracked local .env; add react-app/.env.example.	api/.env	OPEN
M16	LOW	theme_color mismatch (manifest #E8002D vs html #111120) Inconsistent browser UI tint. Fix: Align both to the intended brand colour.	react-app/public/manifest.webmanifest:8	FIXED

Levi

Public Frontend (pages/public, akc3, shared components)

16 ISSUES 11 FIXED 5 PENDING

ID	SEV	ISSUE & FIX	LOCATION	STATUS
L1	HIGH	/news renders an inline placeholder, not a News page Navbar/Footer/Home/CommandPalette link to /news but it renders a stub div. Fix: Build a NewsListPage using getNews() + NewsCard grid with states.	react-app/src/App.jsx:123	FIXED

ID	SEV	ISSUE & FIX	LOCATION	STATUS
L2	HIGH	/news/:slug is a stub Article page Every NewsCard links to /news/:slug but the route renders "Article Page". Fix: Build an article detail page using <code>getArticle(slug)</code> .	react-app/src/App.jsx:124	FIXED
L3	HIGH	/contact is a stub "Support Center" Footer "Send a Message" links to /contact which has no form. Fix: Build a Contact page (form → POST /contacts + info).	react-app/src/App.jsx:145	FIXED
L4	HIGH	Dead links: /privacy and /terms have no route Both redirect to home via the catch-all. Fix: Add /privacy and /terms pages (CMS Page or static).	react-app/src/components/layout/Footer.jsx:151	FIXED
L5	HIGH	Dead link /teams/:id (League teams tab, CommandPalette) Team cards link to a non-existent public team page. Fix: Add a public /teams/:id profile page using <code>getTeam(id)</code> .	react-app/src/pages/public/LeagueDetailsPage.jsx:172	OPEN
L6	HIGH	FixtureCard crashes on null team / undefined name <code>getInitials(name).split()</code> and <code>fixture.homeTeam.name</code> are unguarded. Fix: Optional-chain team access; default <code>getInitials(name="")</code> .	react-app/src/components/shared/FixtureCard.jsx:10	FIXED
L7	HIGH	StandingsTable crashes on null team/form/id <code>s.team.name</code> and <code>s.form.split("")</code> throw when null (fresh rows / AKC). Fix: Optional-chain team; guard <code>(s.form "").split()</code> ; default <code>getInitials</code> .	react-app/src/components/shared/StandingsTable.jsx:6	FIXED
L8	HIGH	LiveScoreTicker reads score.homeTeam.shortName unguarded Ticker sits in the navbar on every page; one null team blanks the whole chrome. Fix: Optional-chain: <code>score.homeTeam?.shortName score.homeTeam?.name</code> .	react-app/src/components/home/LiveScoreTicker.jsx:67	FIXED
L9	MEDIUM	NewsCard: invalid date + /news/undefined link <code>new Date(createdAt)</code> throws on missing date; slug may be undefined. Fix: Guard the date; fall back link to <code>slug id</code> .	react-app/src/components/shared/NewsCard.jsx:9	FIXED
L10	MEDIUM	League teams tab: team.name.charAt crash Null team wrapper throws. Fix: Guard <code>team?.name?.charAt(0)</code> ; skip null.	react-app/src/pages/public/LeagueDetailsPage.jsx:179	FIXED
L11	MEDIUM	No query error states across public pages <code>useQuery</code> only reads <code>data/isLoading</code> ; failures render as empty-states, hiding outages. Fix: Handle <code>isError</code> with a retry affordance.	react-app/src/pages/public/*	OPEN
L12	MEDIUM	AdBanner: external URL via <Link>, missing rel; fragile unwrap <code>react-router <Link></code> mishandles absolute URLs; no <code>rel="noopener"</code> . Fix: Use <code><a href target=_blank rel="noopener noreferrer"></code> ; normalize data.	react-app/src/components/shared/AdBanner.jsx:22	FIXED
L13	LOW	/amashuri/results opens the "Upcoming" tab Status always defaults to SCHEDULED regardless of path. Fix: Init status=COMPLETED when path ends with /results.	react-app/src/pages/akc3/AkcFixturesPage.jsx:22	FIXED
L14	LOW	Seo lacks OG/Twitter/canonical; pages missing <Seo> Only title/description; Leagues/Fixtures/LeagueDetails render no Seo. Fix: Extend Seo (OG/Twitter/canonical) and add to those pages.	react-app/src/components/shared/Seo.jsx:4	PARTIAL
L15	LOW	Sticky sub-bars use fixed top-[68px] vs variable navbar height Ticker ribbon changes navbar height → overlap/gap. Fix: Use a dynamic offset / CSS var.	react-app/src/pages/public/LeaguesPage.jsx:78	OPEN
L16	LOW	Unused imports across public pages <code>addDays/subDays/Users/Star/ChevronRight</code> etc. imported unused. Fix: Remove unused imports.	react-app/src/pages/public/*	OPEN

ID	SEV	ISSUE & FIX	LOCATION	STATUS
A1	HIGH	invalidateQueries uses v4 array form → lists never refresh ~12 admin pages call invalidateQueries(['key']); v5 needs {queryKey:[...]}. Cache never invalidates after mutations. Fix: Convert all to invalidateQueries({queryKey:[...]}).	react-app/src/pages/admin/*	FIXED
A2	HIGH	AdminDashboard shows hardcoded stats + fake activity + dead buttons 842 teams / 12,402 athletes / 124 docs are literals; activity feed static; quick-action buttons have no handlers. Fix: Fetch /admin/stats + /activity; wire buttons to navigate/modals.	react-app/src/pages/admin/AdminDashboard.jsx:58	OPEN
A3	MEDIUM	Two auth stacks with divergent token keys authStore uses rnsnp-token; dead AuthContext uses rnsnp-access-token. Fix: Delete the dead stack (see M6); standardise on authStore.	react-app/src/context/AuthContext.jsx:11	FIXED
A4	HIGH	authStore.refresh never rehydrates user/role After refresh, user/role are stale; a page reload with cleared localStorage bounces valid sessions to login. Fix: Call /auth/me after refresh and update user/role.	react-app/src/store/authStore.js:26	OPEN
A5	HIGH	AdminNewsPage create modal does not submit Inputs are unbound, no create mutation, Publish button has no onClick. Fix: Wire inputs + createNewsMutation (POST /news) + feedback.	react-app/src/pages/admin/AdminNewsPage.jsx:88	OPEN
A6	MEDIUM	News/Players Edit buttons are non-functional Edit icons render but have no handler; no edit modal/mutation. Fix: Add edit modals + PUT mutations.	react-app/src/pages/admin/AdminNewsPage.jsx:72	OPEN
A7	MEDIUM	AdminAdsPage modal omits targetUrl/position Only Title + Image URL inputs; position hardcoded HOME_BANNER. Fix: Add targetUrl + position inputs; disable button while pending.	react-app/src/pages/admin/AdminAdsPage.jsx:82	OPEN
A8	HIGH	assignReporter/assignAdmin hit nonexistent endpoints; no error/guard POST /leagues/:id/assign-reporter and /admin/assign-league-admin don't exist; no onError/invalidate; selectedLeague unguarded. Fix: Create backend routes (K); add onError + invalidation + null guard.	react-app/src/pages/admin/AdminLeaguesPage.jsx:62	OPEN
A9	HIGH	LiveReportingPage: null-user crash, wrong data, dead controls user.id when null; fetches ALL scheduled fixtures; minute hardcoded 45; cards omit teamId; score never refetches; half/finish buttons dead. Fix: Guard user?.id; reporter-scoped fetch; minute input; include teamId; invalidate the on-screen fixture; wire controls.	react-app/src/pages/admin/LiveReportingPage.jsx:9	OPEN
A10	LOW	StatCard dynamic Tailwind classes never compile bg-\${color}/5 etc. are purged by JIT → colourless icons. Fix: Map color→full static class strings.	react-app/src/pages/admin/AdminDashboard.jsx:11	FIXED
A11	LOW	AdminPlayersPage: no debounce/empty-state/delete-confirm Search fires per keystroke; empty tbody; delete has no confirm/onError. Fix: Debounce search; add empty state + confirm + onError.	react-app/src/pages/admin/AdminPlayersPage.jsx:10	OPEN
A12	MEDIUM	Missing empty/error states across admin tables Blank tables on empty/failed fetch with no message. Fix: Add empty-state rows + error UI.	react-app/src/pages/admin/*	OPEN
A13	MEDIUM	Client role trusted for gating localStorage rnsnp-role gates the admin UI; a user can set SUPERADMIN to mount it. Fix: Treat role as a UI hint; rely on server 401/403 and surface them.	react-app/src/components/Layout/AdminLayout.jsx:12	OPEN
A14	MEDIUM	AdminSettingsPage sets state inside queryFn Side-effect in fetch can overwrite unsaved edits on refetch; no onError. Fix: Initialise in onSuccess/useEffect; add error handling.	react-app/src/pages/admin/AdminSettingsPage.jsx:11	OPEN

ID	SEV	ISSUE & FIX	LOCATION	STATUS
A15	MEDIUM	TeamDashboard: magic doc rule + dead "Register Athlete" link Hardcodes "3 docs required"; links to /team/players/new which doesn't exist. Fix: Derive required docs from API; fix/add the route.	react-app/src/pages/team/TeamDashboard.jsx:30	OPEN
A16	HIGH	Team portal pages are stubs /team/players, /documents, /fixtures, /profile render placeholder divs. Fix: Build the four team pages (or disable nav until built).	react-app/src/App.jsx:173	OPEN
A17	MEDIUM	AkcAdminDashboard: Add School / Manage / CSV import inert Buttons have no handlers; file input has no onChange; importMutation never called. Fix: Wire the CSV import + Add School/Manage actions.	react-app/src/pages/admin/AkcAdminDashboard.jsx:68	OPEN
A18	LOW	Reporter portal has one route and no nav ReporterLayout has no sidebar/profile/history. Fix: Scope the reporter surface; add routes/nav if intended.	react-app/src/App.jsx:180	OPEN
A19	LOW	No per-page role gating for LEAGUE_ADMIN/FEDERATION_ADMIN All admin roles see every page/action. Fix: Gate nav items/pages by role.	react-app/src/components/layout/AdminLayout.jsx	OPEN

Brian

Internationalisation (i18n) & Accessibility

14 ISSUES 5 FIXED 9 PENDING

ID	SEV	ISSUE & FIX	LOCATION	STATUS
B1	HIGH	Footer is 100% hardcoded English No useTranslation; all labels/links/copyright literal. Fix: Add footer.* keys (en/fr/rw/sw) and use t().	react-app/src/components/layout/Footer.jsx	OPEN
B2	HIGH	Sidebar hardcoded (admin + team nav) All nav labels + portal titles literal. Fix: Add sidebar.* keys; reuse nav.* where possible.	react-app/src/components/layout/Sidebar.jsx:10	OPEN
B3	HIGH	Admin pages are ~entirely hardcoded The 13 routed admin pages have zero t() calls. Fix: Introduce admin.* namespace; wrap headings/tables/buttons/forms.	react-app/src/pages/admin/*	DEFERRED
B4	HIGH	RegisterTeamPage ~95% hardcoded incl. Zod messages Only common.back is translated; labels/placeholders/buttons/success + validation messages are literal. Fix: Add register.* keys; build Zod schema with t().	react-app/src/pages/auth/RegisterTeamPage.jsx	OPEN
B5	MEDIUM	LoginPage partly hardcoded; unused auth.login_title Heading/placeholders/footer/error literal though keys exist. Fix: Use existing keys; add placeholder/footer/error keys.	react-app/src/pages/auth/LoginPage.jsx:61	OPEN
B6	MEDIUM	Navbar stray hardcoded strings "Register Team", "Appearance", "Language", aria-label "Search" literal. Fix: Use t() + new nav.* keys.	react-app/src/components/layout/Navbar.jsx:140	OPEN
B7	MEDIUM	HomePage hardcoded strings Badge/Match Spotlight/Live/No Active Matches/Bulletin/Seo literal. Fix: Wrap in t(); wire orphaned home.* keys.	react-app/src/pages/public/HomePage.jsx:57	OPEN
B8	MEDIUM	MatchDetailsPage hardcodes strings that already have keys "Real-time"/"Full Time" literal despite match.* keys existing. Fix: Use t('match.*'); add match.tbd.	react-app/src/pages/public/MatchDetailsPage.jsx:146	OPEN

ID	SEV	ISSUE & FIX	LOCATION	STATUS
B9	MEDIUM	No language detector (browser language ignored) Ing only from localStorage len; non-English browsers still get English. Fix: Add i18next-browser-languagedetector (localStorage→navigator).	react-app/src/i18n/index.js:18	FIXED
B10	MEDIUM	<html lang> never updates on language change Stays lang="en" for all locales (a11y/SEO). Fix: i18n.on(languageChanged) → document.documentElement.lang.	react-app/index.html:2	FIXED
B11	LOW	Unused/dead translation keys Many keys (home.* CTA, match.* live, auth.login_title) have no consumer. Fix: Wire or remove to keep locale files honest.	react-app/src/i18n/locales/*.json	OPEN
B12	MEDIUM	a11y: lang switcher & hamburger lack aria; no outside-click/esc No aria-label/expanded/haspopup; dropdown not keyboard-dismissible. Fix: Add aria-* + outside-click/Escape close.	react-app/src/components/layout/Navbar.jsx:86	FIXED
B13	LOW	a11y: viewport disables pinch-zoom maximum-scale=1, user-scalable=no fails WCAG 1.4.4. Fix: Remove maximum-scale/user-scalable.	react-app/index.html:5	FIXED
B14	LOW	a11y: language buttons lack aria-current/pressed Active language conveyed only by colour. Fix: Add aria-current/aria-pressed.	react-app/src/components/layout/Navbar.jsx:96	FIXED
